

It's high time to

Legalise Marijuana!

Nice people take drugs too

Criminalising society reduces our GDP

Won't need new prisons & save \$60M/yr

Free up police and justice system to focus on actual crime

Helps bring trust back to the police force (and raise morale)

Cannabis Industry will stimulate Job Growth!

Foster pot-tourism to add billions to tourism market

Effective treatment for Glaucoma and Multiple sclerosis

Cannabis scientifically proven to reduce lung cancer!

God made weed, man made Alcohol - who do you trust?

Half of all Kiwis are criminals... because 52% have tried pot

Prohibition provides lucrative revenue stream to gangs

Pot seeds are a great source of nutrients

Hemp excellent in-demand quality fibre

Pot enriches soil by fixing nitrogen

Emerging Clinical Applications for Cannabis & Cannabinoids: A review of the recent scientific literature in 2009, reviews nearly 200 scientific trials assessing the therapeutic utility of cannabinoids for the treatment of nineteen clinical indications: Alzheimer's disease, ALS, chronic pain, diabetes mellitus, dystonia, fibromyalgia, gastrointestinal disorders, gliomas, hepatitis C, HIV, hypertension, incontinence, MRSA, multiple sclerosis, arthritis, sleep apnoea, and Tourette's syndrome.
